Thank you Steve,

Are still storing water in Tank13 and if so how gals/barrels?

Thanks

Brian

I am working on and will take a few more days the volumes of waste removed from the tanks thus far.

Tank 15 cleaned, repaired and in diesel service
Tank 16 cleaned, repaired and in diesel service
Tank 14 cleaned, repaired and in diesel service
Tank 12 cleaned, repaired and in diesel service

All tanks meet API 653 Specifications

Tank 30 cleaned and will be repaired
Tank 26 being cleaned will be finished in about five more days and will be repaired
Bullet tank to be cleaned, inspected and repaired if necessary
Tank 7 to be cleaned and scraped

Good morning Mr. Kiggans and Mr. Wilson

I am in the process of submitting comments to the contractor on the draft Remedial Investigation Report for the Falcon Site this week. I would like to provide them an update on what tanks have been cleaned, are in the process of being cleaned, will be put back in service and, scrapped. I would also like to know the volume of wastes by type (sludge, water, etc) and where they are currently stored. It would be helpful if you could provide a schedule of disposing of the wastes and tank refurbishment/demolition. I would like to have the total volumes of waste by type that have been removed since LTRI purchased the refinery. Please reply back and let me know how quickly you can provide this information. The final report is scheduled to be completed by mid May and need this information as soon as possible.

Thanks
